

Power Supply Voltage Specifications

For LCD1602

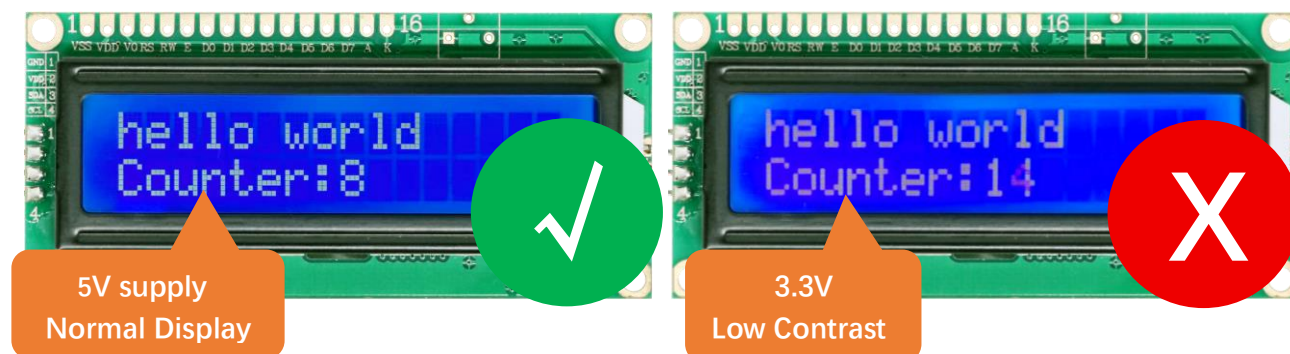

So far, at this writing, we have four types of LCD1602 on sale.

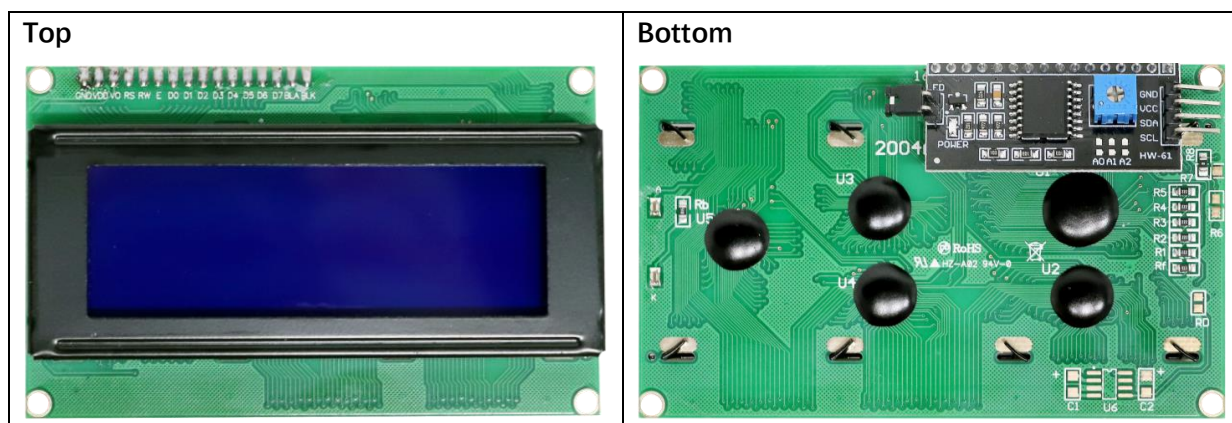

Model	Power Supply	SDA Voltage	SCL Voltage
LCD1602	5V	3.3V~5V	3.3V~5V

Important Note:

The LCD1602 must be powered with 5V; 3.3V results in low contrast.

For LCD2004

Model	Power Supply	SDA Voltage	SCL Voltage
LCD2004	3.3V~5V	3.3V~5V	3.3V~5V

The LCD2004 model can be powered with 3.3V~5V supply.

To enable the backlight, use a jumper cap to short the pins on the back of the LCD2004, as shown in the image below:
